

# Webinar Series

## Understanding the Health, Educational, Judicial, and Social Outcomes of Manitoba Children Exposed to Intimate Partner Violence

Join Us!

**August 13**  
12:00-1:30 PM MST

**Dr. Kelly Russell**

## About the Webinar

During this talk, we will develop an understanding how intimate partner violence in the home can affect children's physical, mental, educational, judicial, and social outcomes as they transition into adolescence and young adulthood compared to their peers who were not exposed to intimate partner violence. We will also learn how administrative data can be used to conduct longitudinal studies.

## Featuring

**Dr. Kelly Russell** is an Associate Professor in the Department of Pediatrics and Child Health at the Max Rady College of Medicine at the University of Manitoba and holds an adjunct appointment in the Department of Community Health Sciences. She is a research scientist at the Children's Hospital Research Institute of Manitoba. She has held the Robert Wallace Cameron Endowed Chair in Evidence Based Medicine since 2019.

She completed her PhD in epidemiology at the University of Calgary and a post-doctoral fellowship in sport-related traumatic brain injuries at St. Michael's Hospital in Toronto. Since arriving at University of Manitoba in 2012, she has developed a research program in pediatric injuries, with a concentration in pediatric sport-related concussions. Starting in 2020, Dr Russell applied her skills to developed a second research program in intimate partner violence and brain injuries. She is also interested in the long-term outcomes of children who grow up in households where intimate partner violence occurs. Her research is funded by the Canadian Institutes of Health Research, Research Manitoba and the National Football League Scientific Advisory Board.
